

Live Q&A 3 Transcript

[Sorry there isn't much down in this transcript. I was ill for a good part of yesterday, which was ELA day, so I don't understand most of what happened in the live session.]

I assumed Odinaldo went through the lecture material after the first question.]

Preliminaries

Please fill out the survey!

Lecture 4 will be released partially at midnight tonight. The second part will be available in the weekend because we are still working out subtitles for the second part. It will come by Monday.

Try to keep up to date, and contribute to KEATS!

Questions and answers

Do we need to simplify when writing to DNF and CNF?

You don't need to simplify, but it's not the only formula that's logically equivalent to the original formula.

However, it's important to understand where the simplifications come from.

[Odinaldo then went on to go through the lecture material from KEATS.]
